BEARDED IRIS

Landscaping With Flowers

The Bearded Iris when properly handled lends its self to the most beautiful and artistic subject for landscaping with color. It has been our lot to have executed some of the largest of landscape projects in this part of the United States. By this experience we have found that the average home owner is glad to receive proper economic and artistic advice on the planting of his own home grounds. For the benefit of our many customers, we have selected out of the approximately thirty thousand varieties of Bearded Iris, just six varieties: Purple, Red, Pink, Yellow and White. All solid or self colors. These plants will be listed as to color only.

Every phase of plant life has been gone into on the selecting of these plants, clear non-fading color, proper foliage and form, hardiness under unusual weather conditions, height and resistance to the things that sometimes plague the Iris grower. The prices will be such as all can afford, the six varieties of solid colors have all received popular acclaim in the past. Buy them in quantities and plant them in solid clumps, in the color that best lends its self to your landscape picture.
